## School Trust Land Beginnings

Thomas Jefferson had the idea...

Theodore Roosevelt made it a reality

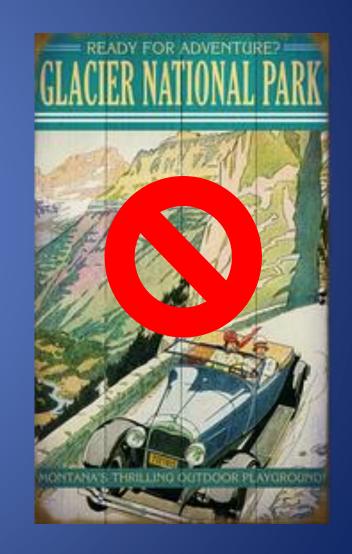

Education for all the children of the United States is the key to creating a strong democracy

- Jefferson's idea Fund education by using income from land to supplement public school funding.
- Roosevelt took it a step further Created the program that required the new territories, the territories seeking statehood, to receive land to help fund education.

### **School Trust Lands <u>ARE NOT</u> Public Lands or Parks**

- State Enabling Acts and State Constitutions often label all lands as public trust land thus, leading to confusion regarding purpose, use and benefit of certain types of land.
- State trust lands are not "public lands" in the same sense as national parks and forests. Instead, they are managed by a board of trustees within each state, and for clearly specified beneficiaries, principally the common schools.

#### State Trust Lands vs. Federal Lands

- Today WSLCA member state trust lands total 156 million surface acres and 177 million mineral acres\*, spread across 21 of the lower 48 states, and Alaska, primarily west of the Mississippi River
- State trust lands generate more than seven times the amount returned to the U.S. Treasury by all federal lands combined.

#### Who are State Trust Land Beneficiaries

Each state Constitution prescribes the beneficiaries that receive earnings from trust lands:

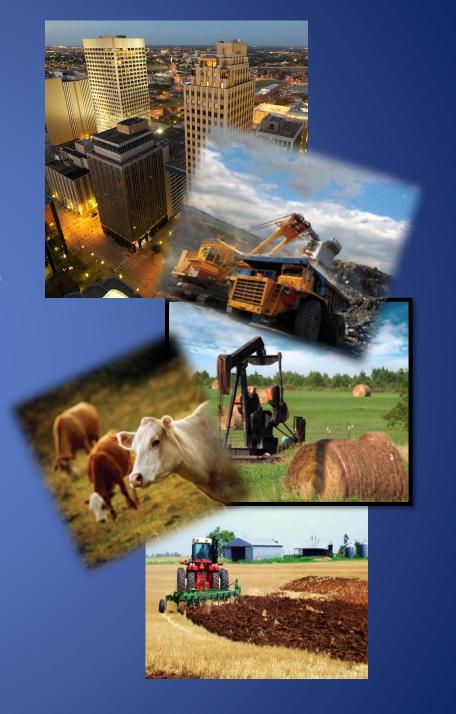

- The largest beneficiary and the majority of all earnings is to common schools (k-12).
- In most western states higher education institutions are also beneficiaries and receive revenues from quantity grants

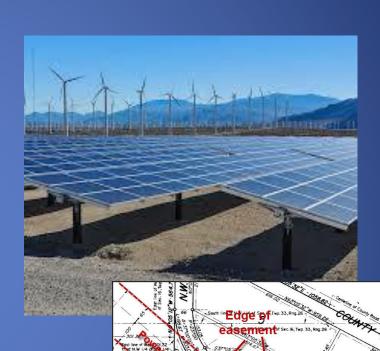

# How Is Revenue Earned for Beneficiaries?

- Income from agricultural leases
- Income from timber harvest contracts
- Income from commercial leases
- Income from mineral and petroleum extraction
- Interest earnings from bonds
- Dividend income from equities
- Sale of energy production

#### Additional Trust Land Uses

- Rights-of-way (pipelines, roadways)
- Water easements for well placement and water leases
- Saltwater disposal units
- Wind and solar farms
- Recreational & special use permits
- C02 leases and geothermal leases

#### Become a WSLCA member...make a difference

#### The WSLCA is more than states!

We value participation from business, industry and non-profit organizations who help develop our resources, provide outreach to the public and who support our mission to help states fund education.

#### Members Share Knowledge and Expertise:

- Banking and institutional investment
- Technology and tools (GIS layers, accounting software, purchasing)
- Leadership and executive C-suite training
- Professional and technical natural resource staff training
- Sharing and branding best practices
- Modernizing regulations and business practices

# Enduring Sponsorship & Member Programs with the WSLCA

- Conference and web events help WSLCA members share and grow professionally
  - Annual summer conference is July 8-12, 2018 in Duluth, MN
  - Mentor the next generation Student Scholarships to attend conference
  - Variety of sponsor and participation levels <u>www.wslca.org</u>
- Basic Affiliate membership \$3,000/year
  - Dialog and participate in strategic initiatives covering a variety of industries, develop best practice, work together on professional training content and delivery.
  - WSLCA is a 501(c)3 non-profit so all donations are tax deductible.
